The Standard Barometer and Thermometer are read at 8 a.m., 12 a.m., 4 p.m. and 8 p.m., and the daily mean are obtained by the application of hourly corrections deduced from twenty years' observations. The column of the Barometer is twenty-two feet above the level of the sea, and the pressure of the sea gauge is two feet from ground. The wind, rain and general weather registered are for the nearest Civil Day—from midnight to midnight.

The total quantity of rain collected since January 1st is 25.01 inches, the average for the same period being 47.28 inches.

2. For section 12 of the Madras City Municipal Act, 1919 (hereinafter referred to as the said Act), the following shall be substituted:—

As the law stands at present, the Commissioners, the Revenue Officer, the Health Officer and the Engineer cannot take up any work, honorary or paid, not connected with their office. There is no such absolute prohibition even in the case of Government officers, and it is proposed to allow the Commissioner, who is appointed by the Government, to take up extensive work with the previous sanction of the Government and the Corporation, and the other officers with the previous permission of the Corporation.

The stated amendment is intended to enable women to stand as candidates at municipal elections. They can only vote at present.
